MediPrep – Patient-Wise Laboratory Investigation Requirements

Assigned Laboratory Investigations & Official Preoperative Diagnostic Worklist

Total Requisitions	Active Pending Uploads	Reports Uploaded	Reports Verified	Audited Inactive / Cancelled
8	7	0	0	1

Clinical Requisition Policy & Scope: This document itemizes all clinical laboratory investigations mandated by preoperative readiness protocols in the MediPrep system. In accordance with clinical safety guidelines, mandatory laboratory reports are linked strictly to procedural risk criteria: (1) **Left Heart Catheterization (CPT-93452)** requires a recent 12-lead Electrocardiogram (ECG) report prior to vascular puncture and arterial cannulation; (2) **CT Scan Abdomen and Pelvis (CPT-74177)** mandates a baseline Renal Function Panel (Serum Creatinine & eGFR) to assess nephrological clearance prior to intravascular iodinated contrast administration. Non-interventional or imaging procedures without contrast (e.g. Diagnostic ECG, Non-contrast MRI) do not require laboratory blood/specimen uploads.

Section A: ECG Reports (Procedure ID 1 – Left Heart Catheterization)

Clinical Indication: Mandatory cardiac rhythm and ischemic baseline assessment prior to invasive coronary catheterization (Left Heart Catheterization, CPT-93452). Required checklist task: Upload Recent ECG Lab Report.

Patient Name & ID	Procedure & CPT	Scheduled Date/Time	Required Investigation	Report Status	Verification
Harikrishnan Nair Patient ID: #143	Left Heart Catheterization CPT-93452	11-11-2026 02:00 PM Dr. Anil Kumar	**Recent ECG Lab Report** Hospital Lab Tech Module	**Pending Upload** Awaiting Lab	Unverified
Arun Kurup Patient ID: #141	Left Heart Catheterization CPT-93452	10-11-2026 10:00 AM Dr. Anil Kumar	**Recent ECG Lab Report** Hospital Lab Tech Module	**Pending Upload** Awaiting Lab	Unverified
Meenakshi Warrier Patient ID: #140	Left Heart Catheterization CPT-93452	09-11-2026 09:30 AM Dr. Robert Chen	**Recent ECG Lab Report** Hospital Lab Tech Module	**Pending Upload** Awaiting Lab	Unverified
Kavya Nair Patient ID: #138	Left Heart Catheterization CPT-93452	08-11-2026 10:00 AM Dr. Robert Chen	**Recent ECG Lab Report** Hospital Lab Tech Module	**Pending Upload** Awaiting Lab	Unverified
John Doe Patient ID: #4	Left Heart Catheterization CPT-93452	04-11-2026 10:00 AM Dr. Robert Chen	**Recent ECG Lab Report** Hospital Lab Tech Module	**Pending Upload** Awaiting Lab	Unverified

Section B: Renal Function Reports (Procedure ID 10 – CT Scan Abdomen and Pelvis)

Clinical Indication: Glomerular filtration clearance screening prior to intravenous iodinated contrast injection (CT Scan Abdomen and Pelvis, CPT-74177). Required checklist task: Upload Renal Function (Creatinine) Lab Report.

Patient Name & ID	Procedure & CPT	Scheduled Date/Time	Required Investigation	Report Status	Verification
Manu Chandran Patient ID: #147	CT Scan Abdomen and Pelvis CPT-74177	13-11-2026 02:00 PM Dr. Sneha Thomas	**Renal Function (Creatinine) Lab Report** Hospital Lab Tech Module	**Pending Upload** Awaiting Lab	Unverified
Gopakumar Pillai Patient ID: #145	CT Scan Abdomen and Pelvis CPT-74177	12-11-2026 11:30 AM Dr. Sneha Thomas	**Renal Function (Creatinine) Lab Report** Hospital Lab Tech Module	**Pending Upload** Awaiting Lab	Unverified

Audited Inactive & Cancelled Requisitions (Excluded from Active Dashboard Queue)

Data Governance & Medical Record Integrity: In compliance with hospital data retention policies, when a patient account is deleted or a procedure is cancelled, associated records are safely deactivated rather than physically purged. The record below is retained for clinical audit compliance but is strictly excluded from active hospital laboratory queues.

Patient Name & ID	Procedure & CPT	Scheduled Date/Time	Required Investigation	Report Status	Verification
aaa bbb Patient ID: #86	Left Heart Catheterization CPT-93452	21-10-2026 12:00 PM Dr. Robert Chen	**Recent ECG Lab Report** Hospital Lab Tech Module	**Cancelled** Booking Void	N/A

4. Laboratory Requisition Fulfillment & Governance Matrix

Summary breakdown of procedural requisitions, fulfillment entities, and diagnostic criteria:

Investigation Type	Procedure & CPT	Total Requisitions	Active Pending	Uploaded / Verified	Responsible Entity
12-Lead ECG Tracing	Left Heart Catheterization CPT-93452	6 *(5 Active, 1 Cancelled)*	5	0 / 0	Central Clinical Lab Hospital Lab Tech
Renal Function Panel Creatinine & eGFR	CT Scan Abdomen & Pelvis CPT-74177	2 *(2 Active)*	2	0 / 0	Central Clinical Lab Hospital Lab Tech
Total System Requisitions	**All Procedures**	**8 Requisitions**	**7 Active**	**0 / 0**	**Central Hospital Lab**

5. Hospital Laboratory Standard Operating Procedure & Verification Sign-off

Standard Operating Procedure for Laboratory Technicians:
1. **Identity Verification:** Validate two patient identifiers (Full Legal Name, MediPrep Patient ID, DOB) against electronic booking.
2. **Diagnostic Analysis:** Perform ordered investigation (12-lead Electrocardiography tracing or automated Serum Creatinine/eGFR analysis).
3. **Secure Electronic Ingestion:** Upload official authenticated PDF/Image report via Hospital Lab Portal (/lab/dashboard).
4. **Tamper-Proof File Locking:** Upon submission, report files are digitally locked, preventing modification, and routed to Attending Doctor.
5. **Clinical Handover:** The procedure readiness index automatically recalculates, alerting the clinical team of test completion.
